

Sarha Ding, *Mixed Media*, 2016

## FINE ART PHOTOGRAPHY AND MIXED MEDIA

### What you will learn:

This two-week program is designed for high school art students between the ages of 16 and 18 who are about to prepare their college portfolio submission.

Toy with different ways to express your creativity while still staying true to your photographic background. You will learn how to expand into other mediums, this may include digital manipulation, collaging on top of images or painting directly on printed photographs.

Mixed media bridges the gap between photography and drawing and painting. While artists have been using mixed media for decades, many young photographers are excited to use mixed media photography in a way that sets them apart from the rest.

**LEVEL**  
INTERMEDIATE/ADVANCED

**TUITION**  
\$1995

**CLASS SIZE**  
8
